

CRANE AND AERIAL DEVICES

AREA OF RESPONSIBILITY:

The evaluation of cranes and aerial devices used by all departments within DOT.

This committee will establish inspection guidelines and techniques set forth by OSHA, ANSI, DOT, and the manufacturer. It will write inspection checklists for use by inspectors within the department and operators to use on a pre-use basis.

This committee will aid in the establishment of training for inspectors and operators inside DOT.

The committee will give recommendations on future equipment purchases to better serve our needs within the using departments.

The committee will investigate complaints and failures of lift equipment in order to recommend proper maintenance or operating procedures.

The committee will identify problem areas and safety hazards, while keeping management informed of any actions that should be taken.

NOTE:

Listed below is a link to the NCDOT forms which can be used to search for the various crane inspection forms.
